

## Encouraging Bolshevism

Everything that falsely encourages unrest also encourages bolshevism.

Misunderstanding of American industrial organization, and of its benefits to mankind, leads to unrest, dissatisfaction, and radicalism.

For example, the Federal Trade Commission tells the public that the large packers had an agreed price for lard substitute (made of cotton-seed oil.)

It reproduces letters taken from the files of one of the packers, showing that such agreed price existed.

But it failed to mention that the agreed price was determined at the request of and in co-operation with the Food Administration!

Even the Department of Justice, in its unjust attempt to create prejudice against the packers, has made public these same letters, with no explanation.

How long must this kind of misrepresentation continue? In so far as it is believed, it not only breeds discontent, but results in injustice to our industry.

Let us send you a "Swift Dollar." It will interest you. Address Swift & Company, Union Stock Yards, Chicago, Ill.

Swift & Company, U.S.A.

If hot weather saps your energy and you can't work well, it is a sign that your system is full of bilious impurities. You will be sick if you do not do something. Take Prickly Ash Bitters, it cleanses the blood, liver and bowels, restores strength, vim and cheerful spirits. Price \$1.25 per bottle. Sold by all dealers.

**Colds Cause Grip and Influenza**  
LAXATIVE PROMU QUININE Tablets remove the cause. There is only one "Promu Quinine." E. W. GROVE'S signature on box. 30c.

**Habitual Constipation Cured in 14 to 21 Days**

**Piles Cured in 6 to 14 Days**  
Your druggist will refund money if PZO OINTMENT fails to cure any case of itching, blind, bleeding or protruding Piles in 6 to 14 days. The first application gives ease and rest. 50c.

# Ford

THE UNIVERSAL CAR

Ford cars are important servants everywhere. They help the family enjoy life, bring the pleasures and advantages of the town within reach of the farmer and give practical service every day in country and town. They require a minimum of attention; any one can run a Ford and care for it, but it is better to have repairs and replacements taken care of by those who are familiar with the work and have the tools, the genuine materials, and skilled men to do the work promptly. We pledge Ford owners the reliable Ford service with real Ford parts and standard Ford prices.

Columbus Auto Co.

## DANGER IN WILD FLOWERS

Many Are a Prolific Cause of Hay Fever, According to Expert Who Sounds Warning.

Hay fever is relatively common in children, but the reason that this is not more generally known is that these attacks are usually mistaken for "colds," writes Dr. William Scheppergrell of New Orleans, president of the Hay Fever Prevention association, in the Medical Record.

Sometimes a child that seems to have a "cold" is taken into a park or away to the country in the hope that the fresh air will effect a cure, and it is there exposed to further infection from the pollen of the plants that are chiefly responsible.

Besides the ragweeds, which are the principal offenders, there are several other wild flowers that, though quite innocent when left alone, are likely to cause hay fever if applied directly to the nostrils of children. Among these Doctor Scheppergrell warns us especially against the daisy fleabane, one of the commonest of weeds. It grows from one to two feet in height, has light green almost toothless leaves, daisy-like flowers about half an inch wide, with a large greenish yellow disk, white rays occasionally blanching, shorter than those of the daisy and sometimes entirely absent.

Other flowers against which Doctor Scheppergrell warns are the dandelion, field daisy, black-eyed Susan, and other of the Composite family. These are harmless unless one sniffs their blossoms, in which case they are likely to start a hay fever that may persist well into the fall.

## MADE RECORD DURING WAR

Soldiers Proud of "Stars and Stripes," Official Organ of American Troops in France.

The most remarkable publication born of the war appears to have been "The Stars and Stripes." As it went out of business with the final scattering of its staff in June its record is now open to the public.

The publication was, as is well known, the official organ of the American expeditionary forces in France, and there is no doubt that it lived up to its dignity in a handsome manner. It started with a circulation of 30,000, and this was increased to 550,000 in less than a year. It maintained a French war orphan fund, to which 450,000 soldiers contributed 2,000,000 francs, and in its 16 months of life the paper cleared 3,500,000 francs.

There are other details of its progress and its work, among which is one to the effect that it printed 500 poems by soldiers and rejected 20,000.

The Editor and Publisher prints an extended review of the accomplishments of the paper, and from it we learn that its staff at one time or another contained something like 250 men. Among them were Sgt. Maj. Philip Von Blon, managing editor, and Sgt. Robert I. Snodgrass, staff contributor, both Clevelanders.

## An American Solomon.

The story is told of a member of the American Red Cross, somewhere on the Syrian side of the African continent, who found himself faced with something of the same problem the solution of which earned for Solomon, in ancient days, the reputation of being the wisest of men. On this occasion the child was that of an Armenian woman, found in the house of a Turk at Aleppo, and who, the mother said, had been taken from her when three years old. The child she claimed as hers was a little girl of seven years and she gave no sign of recognizing her mother. The American was puzzled to know what to do. An idea struck him. He told the mother to sing the lullabies with which she had been used to rock her baby to sleep. The little girl looked astonished and thoughtful; then she smiled. Memory had awakened, and the Armenian woman had recovered her child.

## Scientific Management.

"It doesn't do to swallow all the stories you hear about the efficacy of scientific management, but I heard one the other day that I can well believe." Senator Cummins, the speaker, was entertaining a luncheon party at Atlantic City. "So your wife refused to marry you when you first proposed to her? I said to Brown during a confidential chat one day. 'Did you keep on pursuing her till she consented?' " "Not much," Brown replied craftily. "I went out and made a fortune. When I came back it was she who did the pursuing."

## Will Film a Big Game Hunt.

Writing of East Africa reminds me of a young man of greater enterprise than financial resources who has fixed up a contract with a motion picture firm to go on a big game shooting expedition in East Africa and take with him operators and camera. His own cheerful view of the undertaking is that he will get his shooting, and the movie firm will get his pictures, and both will reap substantial profits.—Manchester Guardian.

## Suspicious.

Patience—What's the matter with you and Fred? Patrice—Well, I had a suspicion he wasn't true to me all the time he was in France with his regiment, and now I'm quite sure of it.

"Why so?" "Last night he began saying sweet things to me in French."—You're's Starman.

## URGES USE OF BOTH HANDS

French Authority Points Out the Value of Ambidexterity and Its Need of Cultivation.

France, in her earnest efforts to rehabilitate herself, has come to the wise conclusion that a child—a man or woman of the near future—who can use either hand with equal facility is almost twice as useful to the state as a "right-handed" or a "left-handed" person.

The Paris correspondent of the Journal of the American Medical Association writes of the attempt to encourage ambidexterity in French children.

"At the recent meeting of the Academie de Medicine Doctor Armaingaud pointed out the loss—military, civil and economic—which results from an artificial disability imposed on young children, and therefore on adults, in allowing them to use only their right hand, so that the left hand is used only as an auxiliary to the right.

"Speaking from a military point of view, Armaingaud called attention to the statement made by General Baden-Powell to the effect that no one could doubt the value of ambidexterity. If both hands were used equally by everybody instead of being used only occasionally, or by a few persons, as is the case today, the strength of the army would be increased notably.

"At this time, when the population of France is decimated by tuberculosis and alcoholism, and when the excess of births over deaths is less each year, it is not a matter of indifference to permit the population of France to continue what may be called a physiologic mutilation, one which may be made to disappear at will.

"Armaingaud proposed to the academy (1) to issue an appeal to the people of France, asking that the mothers, in the interest of the nation and in the interest of defense of the country, teach their children from the first to use both hands equally; (2) to request the minister of public instruction to make the equal use of both hands obligatory in all the primary and secondary schools; (3) to urge the foundation of a prize to be awarded annually to the teacher in France who has been most successful in carrying out this most desirable reform."

## Another Antigas Invention.

"Neutralizing ointment" is one of the latest war inventions. It is publicly revealed in an official description of the protective devices against gas attacks, now being issued to our troops.

The mask, with its contained chemicals for neutralizing any poisonous fumes that creep in, is familiar. But one so-called gas is a liquid, and because of its blistering effect the soldiers have given it the name "mustard gas."

When an area is drenched with this stuff the menace may persist for many days. The peril is not from the liquid itself. Mustard gas burns through the clothing, and makes painful wounds where the flesh is reached. The newly invented ointment must apparently be rubbed all over the body, as well as on face and hands, to protect the soldier when the enemy's bursting shells are spraying this horrible liquid gas about.—Providence Journal.

## Phones and Divorces.

Statisticians tell us that there is one telephone for every ninth person in this country and that every ninth marriage ends in divorce. The inference is obvious! The truth is out at last! Mr. Bell's ingenious little invention has joined the discredited ranks of the summer hammock, the cocktail, the fox trot, the roller skate, the ice cream parlor and the automobile. It is indeed a sorry state of affairs. One telephone for every ninth person, and on every ninth phone Cupid gets the busy signal forever! All too soon, alas, the wireless telephone will come into general use, and no home will be complete without its own little aerial ramabout. O, statistician with thy pen, prepare to write new records then!—Thrill Magazine.

## Fish Leathers a Success.

The bureau of fisheries has received a sample lot of leather made from the skins of aquatic animals, including ray, shark, sturgeon, paddlefish and porpoise. It has received also articles made from such leathers, including men's, women's and children's shoes, as well as a belt, wallet, portfolio, brief case, etc. The manufacturers have established stations on the South Atlantic and Gulf coasts where supplies of raw material are obtained, and are producing from such sources a very high grade of leather suitable for nearly every purpose for which leather is used.

## The Rabbit Skin Industry.

Rabbit skins from Australia and New Zealand were among the largest offerings in the recent international fur auction at St. Louis. Half a million pounds of Australian skins and 50,000 pounds from New Zealand were sold for a total of \$335,000. Prices advanced 25 per cent over quotations last January, according to the official market announcement. The largest lots went to hatters and felt manufacturers.

## Hard to Catch.

"Waydown" a comedian in a colored regiment, was asked when he received his discharge if he would enlist in case of another war. His reply was: "Boy, if this man's country gets into another war they is gonna be two men missing—this nigger and the man what's chasing him."

# GINNERY

We have just installed new and latest IMPROVED LUMMUS AIR BLAST GIN SYSTEM, operated by electricity. We have so improved our gin plant until it is equal to any in the state; in fact we feel that cotton ginned on it furnishes the best sample possible. We are prepared to give our customers QUICK AND EFFICIENT service in ginning.

## Flour and Grist Mill

We operate a flour and grist mill and can furnish you with all products in connection. Our mill affords a live local market at all times for wheat and corn, either for purchase or exchange.

"Biscuit Brand" Plain Flour  
"Suffragette" Self-rising Flour  
Wheat Bran and Shorts  
Wheat Screenings

Bolted Corn Meal  
Chops  
Corn  
Feed Meal

## Commercial Mixed Feed

We handle exclusively, the prepared feeds manufactured by the Alfocorn Milling Co., of St. Louis, Mo. This line includes horse, mule, cow, cattle, poultry and hog feeds. Let us furnish you with description and prices.

## Independent Oil & Fertilizer Works

## Hay-- Hay-- Hay.

ALL KINDS OF HAY

Is going to be scarce and high this winter.

Why not buy the the best Mower you can find and make Hay while the sun shines.

We sell the Celebrated Thomas Crown.

This is the only Double Geared machine made.

You can speed the machine up without whipping your team. To show this machine mean a sale. Call and see it.

Columbus Hardware & Furniture Co.

18 cents a package

Camels are sold everywhere in scientifically sealed packages of 20 cigarettes; or ten packages (200 cigarettes) in a glassine-paper-covered carton. We strongly recommend this carton for the home or office supply, or when you travel.

R. J. REYNOLDS TOBACCO COMPANY
